

US Patent Application 10/595,118  
Attorney Docket JANK.P-001-NP

#### AMENDMENT

Please enter the enclosed amendment to the claims and the enclosed substitute specification. The substitute specification includes no new matter.

#### REMARKS

##### **Claim Amendments**

The amendments to the claims show the changes discussed in the interview held on December 8, 2010 and made of record in the enclosed interview summary.

The applicant suggests that the claim amendments are supported by the specification in at least FIGs. 1-4 and in the first paragraph following the header, formerly called: Example of Embodiment, now called: Detailed Description of the Invention, which may be found on the second page of the old specification or the third page of the substitute specification.

##### **Specification Amendments**

The enclosed substitute specification addresses the issues raised during the interview regarding the presence of two differently worded specifications in the file with the same date stamp.

The present specification clarifies and corrects minor grammatical errors and awkward phrasing.

Specification section headings have been amended to conform with rule 1.77.
